DETAILED ACTION

Response to Amendment

Claims 1-18 are in the case.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Agama et al (6,694,944).

Agama et al teach a method of controlling auto-ignition timing comprising the step of compressing gases within the at least one prechamber 45 using the prechamber piston 44 at precisely controlled times to cause auto-ignition in the at least one prechamber, the auto-ignition in the at least one prechamber 45 producing hot gas jets; introducing the hot gas jets from the at least one prechamber 45 into the cylinder 36 and combusting the hot gas jets provided within the cylinder 36 (see col. 4 lines 56-67).

Allowable Subject Matter

2. Claims 8-18 are allowed.

Response to Arguments

3. Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new ground(s) of rejection.
